Reference Letter for Heavy Industry Logistics

To whom it may Concern,

Consolidated Power Project Group Africa Limited was awarded the contract for the supply of Goods, Ancillary Services, and Work for the construction of the substation for the Radiant Energy 40MW Photovoltaic Project in Eldoret, Kenya.

During the project, Heavy Industry Logistics (HiLog) was instrumental in solving our shipping process issues and in completing our projects. HiLog's team understands the intricacy of the Kenya Revenue Authority (KRA) and the Kenya Bureau of Standards (KBS) processes, which helped solve issues that were causing delays to our project. HiLog's team professionalism and ability to produce results were evident from the moment we started engaging with them. After less than two weeks on the job, HiLog's team managed to solve custom clearing issues that were holding back our project for months prior. HiLog's services provided to us include :

- Customs clearance of airfreight and seafreight shipment
- Project management for shipment logistics
- Road transportation from port to site

One of the forecasted point of friction for the project was the transportation of our two 45MVA transformers from the port in Mombasa to the site in Eldoret. We were concerned with the movement, positioning and commissioning of the 2 x 45MVA transformers. In the end, this portion of the project was one of the smoothest, which HILOG completed within the time frame and budget.

HiLog's team was excellent in the services provided to us in Kenya. Because of their professional service and exceptional customer service, we will certainly work with them on our future projects across East Africa.

Kind regards,

PROJECT ENGINEER
